

Voter's power in aging societies – How an aging and shrinking society effects a political system

by

Lars Weber & Veit Schulz

Summary

Research Question

- How will the demographical change effect the political sector?

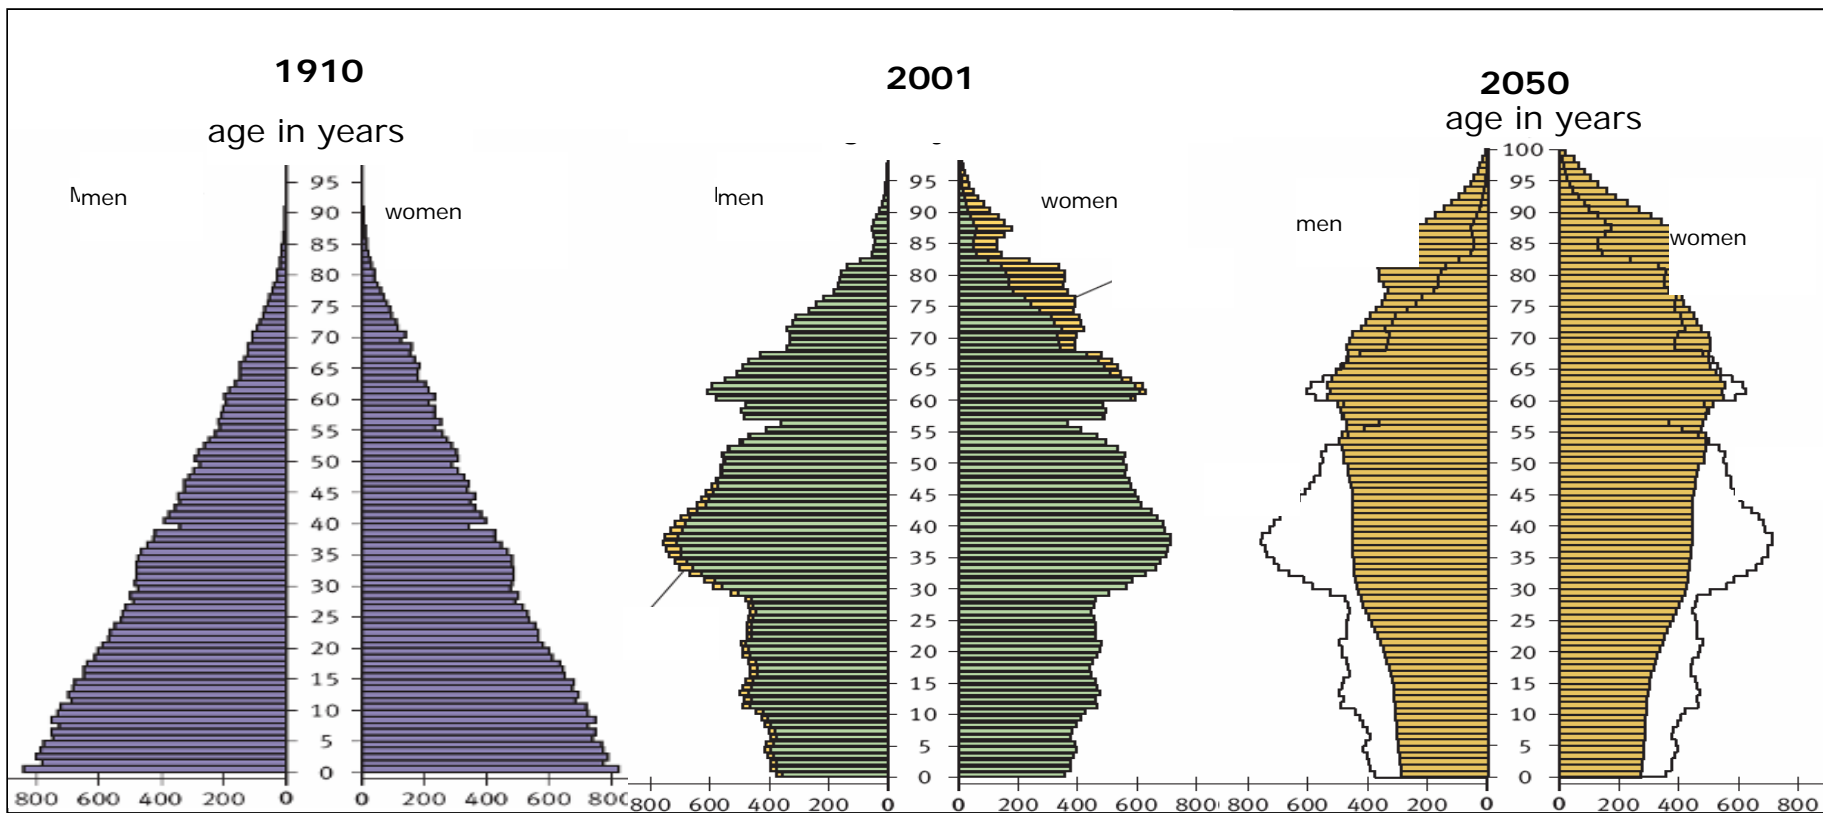

Main Assumptions

- on the case of Germany
- voters participation differs in the age groups (highest participation – elderly people; lowest participation – twenty-some-things)
- no political tendencies or parties are included in this model
- only a policy orientated view which is independent from parties

Further Research

- Implementation of European and transnational migration
- Survey of different European Countries
- Further policy options to analyze possible strategies

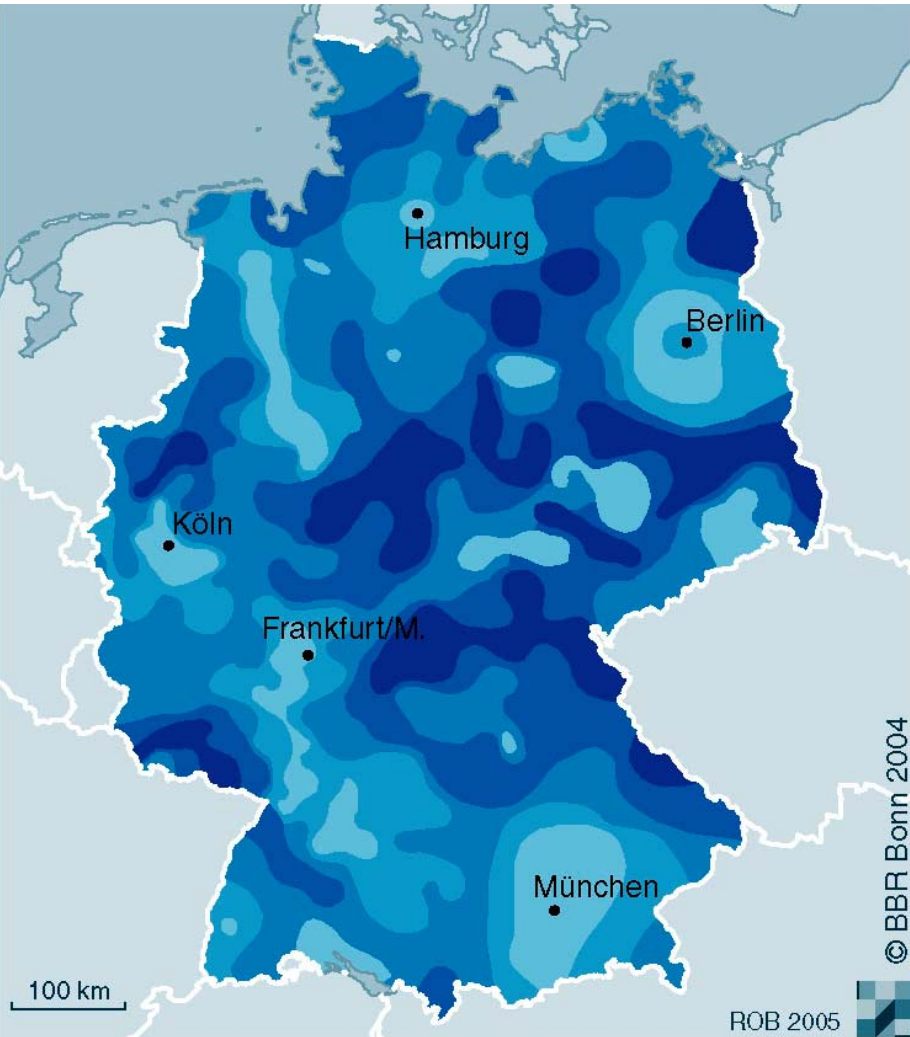

Demographic Trends

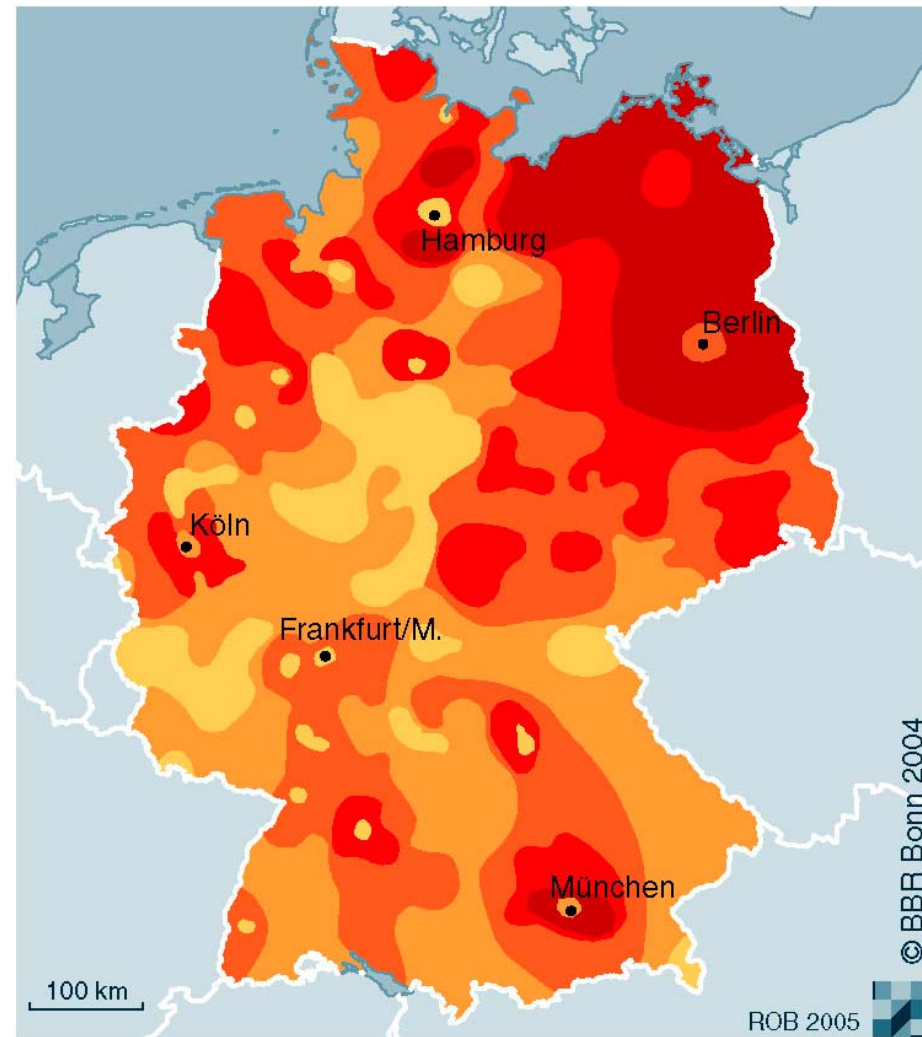

- Life expectancy increases - people become older
- Total fertility rate (TFR) below sustainable level - continuously decline

Demographic Trends

children (6 – 16 years) till 2020

elderly people (over 70) till 2020

Quelle: BBR (2005): Raumordnungsbericht 2005. Berichte Bd. 21, Bonn. Seite 38

Stakeholders

Children orientated Adults (between 20 and 60 years)

- Adults who have children
- family orientated thinking
- favor policies which will not shift a financial burden into the fare future and supports young families

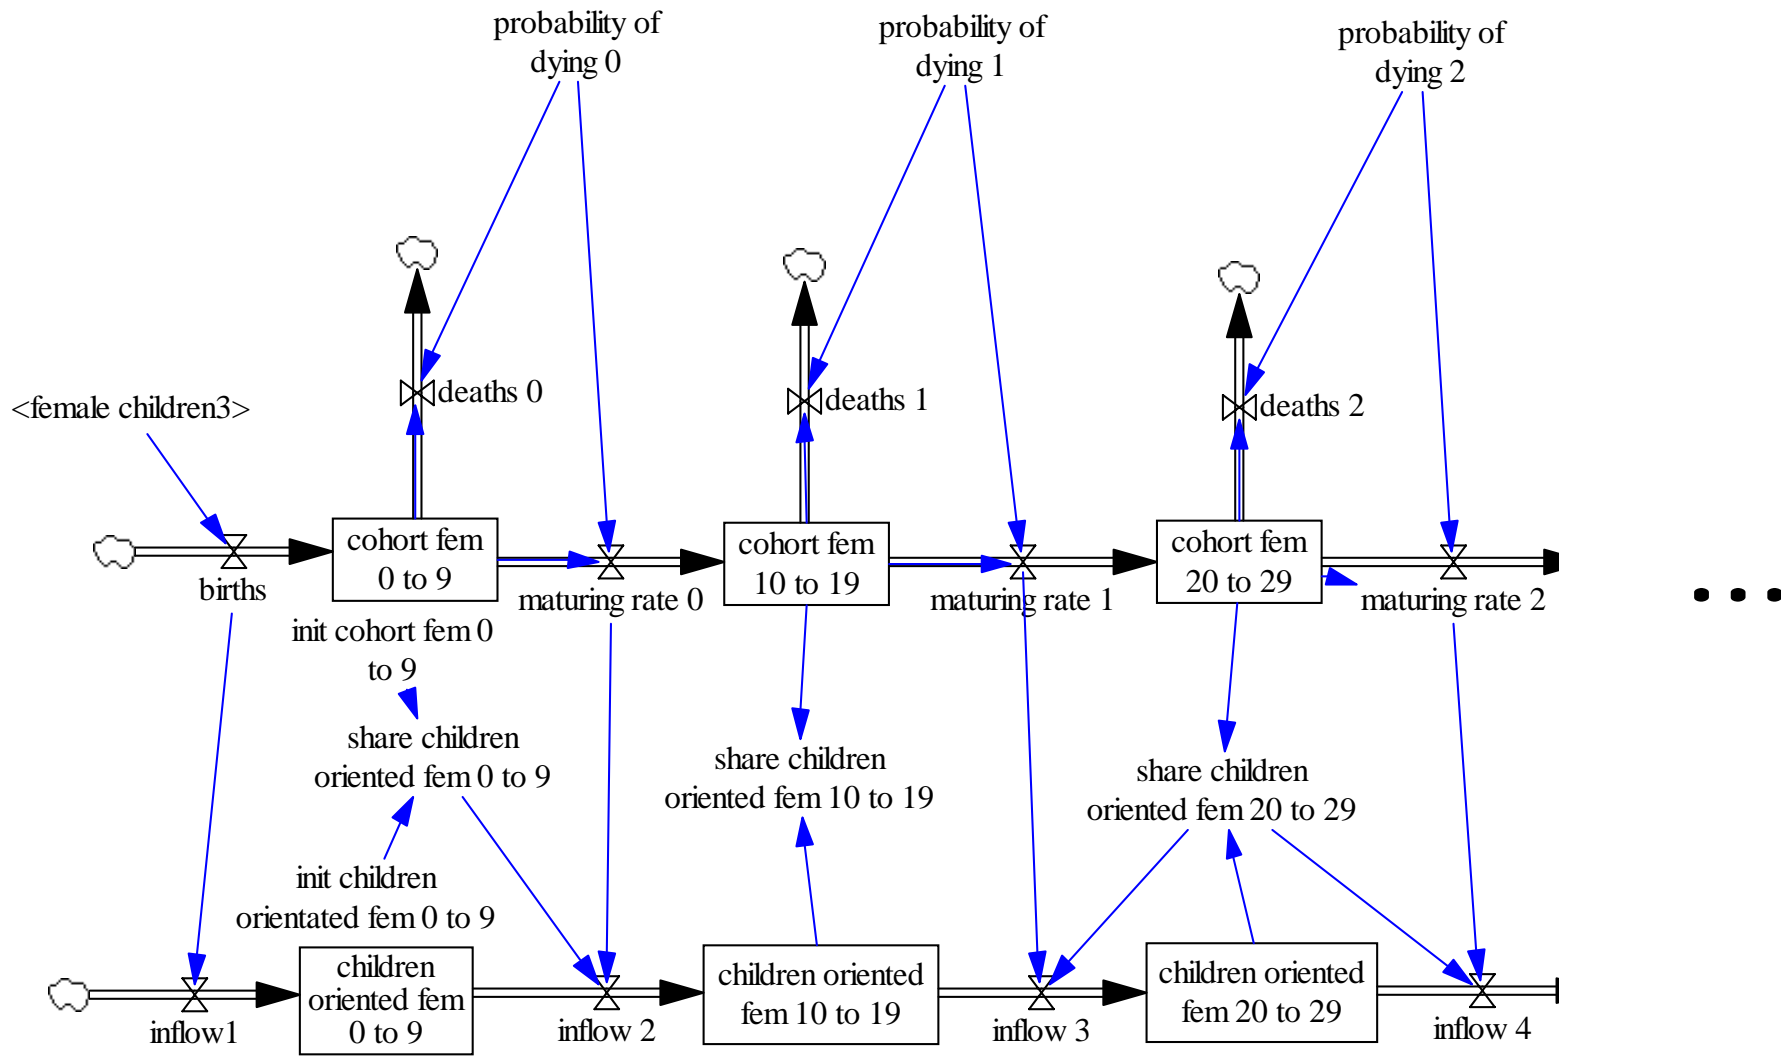

Indifferent Individuals (between 20 and 60 years)

- singels or in a part time relationship
- strong individual thinking
- favor policies which pay off in a certain time frame

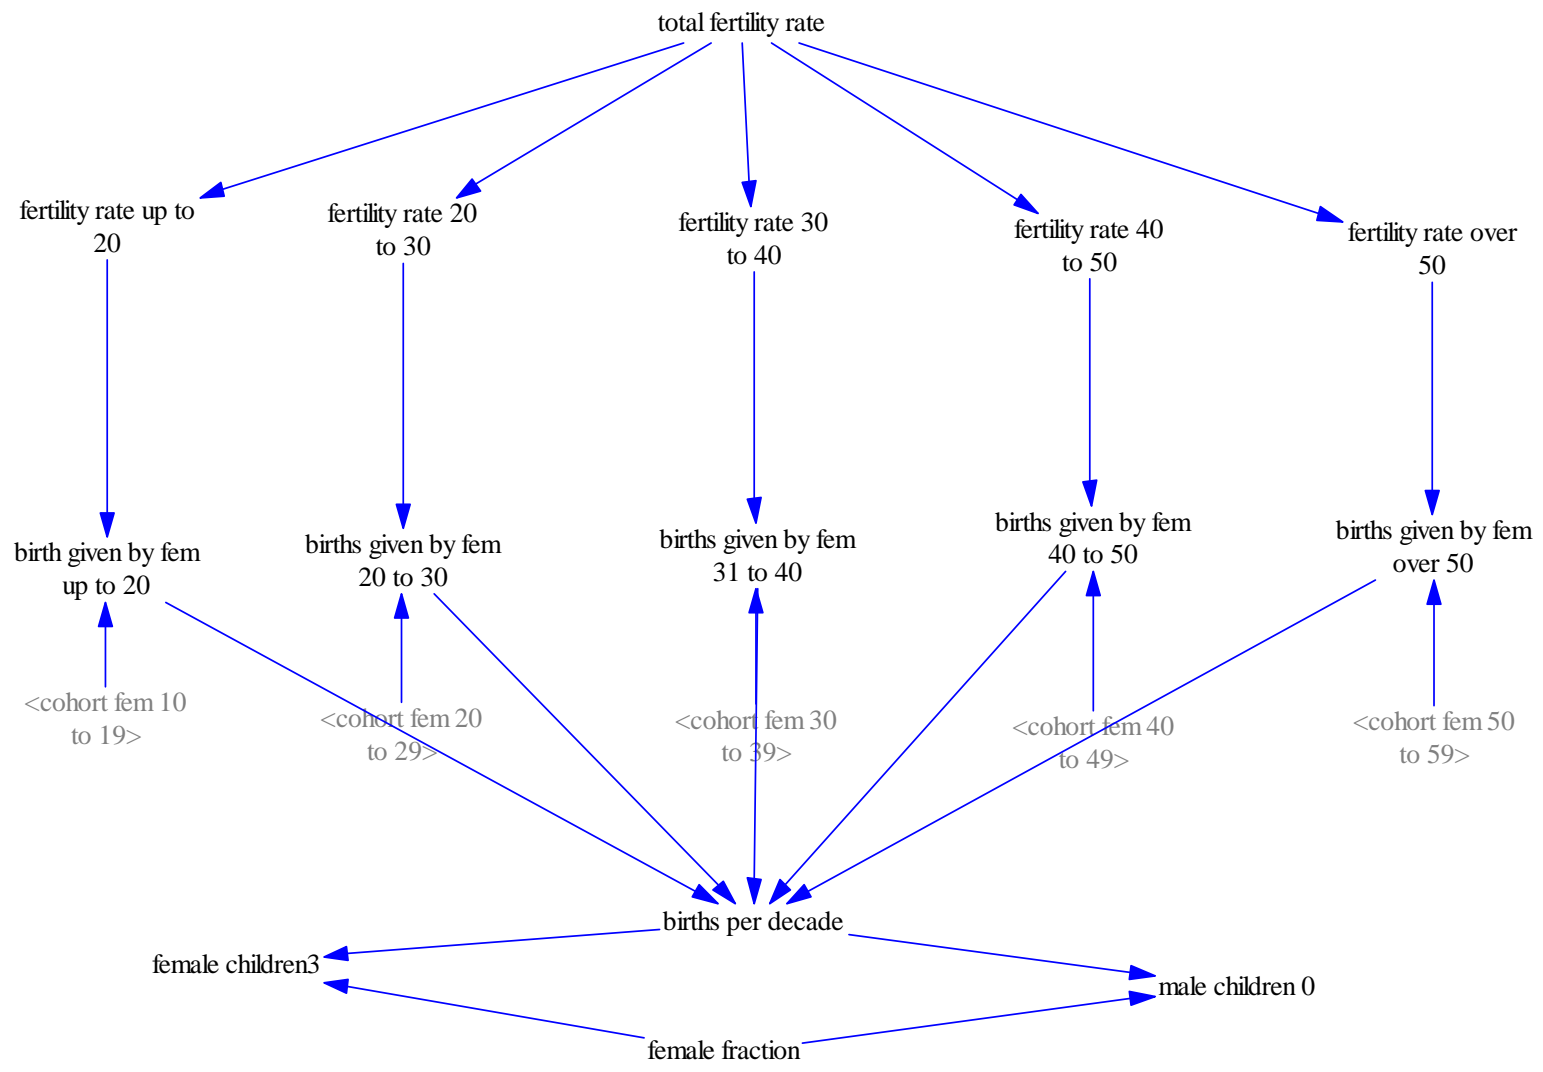

Retired Adults (older than 60 years)

- would like to live their life intensively
- favor policies which pay off in the present or near future

Model – Aging Chain

Model – Total Fertility Rate

Scenarios

1. Current Situation

- TFR 1.34
- no net-migration

2. Voting Right for Children

- each child gets one vote
- votes added to children orientated adults
- no net-migration

3. Total Fertility Rate increases to the sustainable level of 2.10

- no net-migration

4. Total Fertility rate 2.10 plus voting right for children

- no net-migration

Scenario 1

Current Situation Development of the Stakeholder

- Retired Adults — Person
- Children orientated Adults — Person
- Indifferent Individuals — Person

Scenario 1

Current Situation Development of votes of the Stakeholder

Retired Adults ————— Votes
 Children orientated Adults ————— Votes
 Indifferent Individuals ————— Votes

Scenario 2

voting right for children current TFR of 1.3

Without voting right for children

Retired Adults ———— Votes
 Children orientated Adults ———— Votes
 Indifferent Individuals ———— Votes

With voting right for children

Retired Adults ———— Votes
 Children orientated Adults (with Children) ———— Votes
 Indifferent Individuals ———— Votes

Retired Adults ———— Votes
 Children orientated Adults + Indifferent Individuals ———— Votes

Retired Adults ———— Votes
 Children orientated Adults (with children) + Indifferent Individuals ———— Votes

Scenario 3 and 4 - increase of the TFR to sustainable 2.10 plus voting rights for children

Scenario 3 – TFR 2.10

Retired orientated ———— Votes
 Children orientated ———— Votes
 Individuals ———— Votes

Scenario 4 – TFR 2.10 plus voting rights

Retired Adults ———— Votes
 Children orientated Adults (with Children) ———— Votes
 Indifferent Individuals ———— Votes

Retired orientated ———— Votes
 Children orientated + Individuals ———— Votes

Retired Adults ———— Votes
 Children orientated (with children) + Individuals ———— Votes
