Hands-On Modeling United States Energy Policy: Achieving Emissions Targets and Exploring Scenarios

Jeffrey Rissman

Senior Analyst

Energy Innovation: Policy and Technology LLC

Supplementary Files

This workshop includes three segments. Anyone can come to watch, listen, and ask questions without bringing along any materials. However, to participate, you will need a few things:

- To participate in the first segment, which concerns the web application interface, you will need a laptop with an internet connection and web browser.

- To participate in the second segment, which concerns the Energy Policy Simulator in Vensim, you will need a copy of Vensim Model Reader, Vensim Pro, or Vensim DSS version 6.3b (released June 2015) or later. You will also need a copy of the open beta model.

- To participate in the third segment, which concerns the use of Python scripts to perform automated runs and optimization, you will need a copy of Vensim DSS version 6.3b or later. You will also need a copy of the open beta model.

How to Obtain Vensim Model Reader and the Open Beta Energy Policy Simulator

Please go to **http://energypolicy.solutions** for download links and complete instructions. In particular, please read the "**How to Get the Model**" section.
