## System Dynamics Africa Regional Chapter

Martin Schaffernichts

5<sup>th</sup> February 2014

The ISDS Vice President Chapters  
Escuela Ingeniería Informática Empresarial  
Facultad de Economía y Negocios  
Universidad de Talca, Talca (Chile)

Dear Martin,

RE: **REGISTRATION OF THE SYSTEM DYNAMICS AFRICA REGIONAL CHAPTER**

The above subject matter refers.

On behalf of the members of the System Dynamics Society working or interested in Africa specific systemic research and scholarship, appreciate the importance of system dynamics as a problem solving approach.

As Africa Regional-based society members in good standing (See attached Appendix B) have expressed the need to associate, share our experiences and participate together in research and scholarship. These aspirations expressed by members in good standing between 28<sup>th</sup> December 2013 and 8<sup>th</sup> January 2014 culminated in the drafting of our Chapter Constitution here attached.

We called for nominations for various positions of the Chapter Policy Council, which was web-based, inclusive, free and open. I am happy to report that members responded positively and elected Policy Council Office bearers as attached in Appendix A.

It is on the above premise that, since we have about 18 members who are registered with the International System Dynamics Society, and also participated in our local Chapter elections, we would like to formally register this Chapter as a constituent Chapter of the International System Dynamics Society.

I want to take this opportunity to congratulate colleagues who were also elected and also to thank the ISDS for Guidance and support.

Our duty will be service to Africa!

**Prof. Ddembe W. Williams**

BSc, MSc, PhD, PGCHE, FHEA, MBCS  
Dean, Faculty of Computing and Information Management  
Director, Systems Modelling and Data Analytics Research Lab
