Same for Windows & Mac: pull down Edit menu & select 'new model defaults...'

Run Specs

Recommended Workshop Settings

Start Time: 1

Stop Time: 10

DT: 1/ 64 ☒ Fractional

☐ Save Interval: 0.015625

Sim Duration: 1

Time Units: years

☐ Pause Interval: 1

Integration Method: ☒ Euler ☐ Cycle Time

☐ Track flow quantities

☒ Keep all variable results

☐ Calculate loop dominance information

☐ By default keep all run data in comparative graphs and tables

DT is the time step – it determines how quickly the computer updates the values of equations.

- it should be very short
- it should be $(\frac{1}{2})^n$

DT is measured in the same time units as the time units in the model.

Note: Settings do not change the current model
