

How would you describe your institutional affiliation(s)?

- Research (institution or university) (1)
- NGO Sector (2)
- Other (5) \_\_\_\_\_
- Government (3)
- Multi-lateral Organization (4)

---

For the selected institution(s), please share your position title(s).

\_\_\_\_\_

---

How many years of experience do you have in the field of climate change, migration, or other similar fields?

- 1-4 years (1)
- 5-9 years (2)
- 10-14 years (3)
- 15-19 years (5)
- 20+ years (4)

To help us better understand our survey participant demographics, please share your current country of residence.

▼ Afghanistan (1) ... Zimbabwe (1357)

From the list, please select the geographic focus of your work (hold Ctrl to select multiple countries).

▼ Afghanistan (1) ... Zimbabwe (1357)

Which slow onset hazard do you have the most direct experience with (either through in-depth desk research or field studies)?

- drought (1)
- coastal/ river erosion (2)
- heat waves (3)
- land and forest degradation (4)
- flooding (5)
- salinisation (6)
- sea level rise (7)

**End of Block: Demographics/ Experience**

**Start of Block: Factor Definitions**

The questions you will be presented in this survey will ask you to consider the relationships between the top climate migration factors identified in literature. These factors, in ranked order, include:

	<b>Migration Factor</b>	<b>Definition</b>	<b>Examples</b>
<b>1.</b>	<b>Financial Capital</b>	Money available to an individual or household or assets that can be sold	Remittances, equipment, vehicles, livestock, tenure, etc.
<b>2.</b>	<b>Livelihoods</b>	The capabilities and activities that determine the living gained by an individual or household	Economic opportunity in destination location that pulls individuals to move or livelihood (crops, livestock, tourism) failure because of climate related hazards

3.	<b>Health</b>	The physical and mental well-being of an individual	Fitness; Lack of disease, loneliness, or overwhelming stress
4.	<b>Political Stability</b>	Ability of a political system to survive through crises without internal warfare	Citizens have acknowledged rights and freedoms; lack of resource conflicts, corruption, or unrest
5.	<b>Resource Security</b>	The ability of an individual or household to secure access to their current level of natural resource demand	Water, timber, clean air, etc.
6.	<b>Food Security</b>	Access to sufficient, safe, and nutritious food that meets an individual's food preferences and dietary needs for an active and healthy life	Availability of crops or other food resources
7.	<b>Social Services</b>	Government services provided for the benefit of the community's well-being	Health and education services, sanitation systems, amenities (i.e. outdoor recreation)
8.	<b>Social Capital</b>	The networks of relationships among people who live and work in a particular society	Support systems of family or friends
9.	<b>Physical Infrastructure</b>	Private and public built environment assets	Hospitals, schools, utility systems, roads, or homes
	<b>Migration</b>	Movement of an individual or household from one place to another	Movement over jurisdictional boundary for longer than a 3-month period (assume across municipal boundary for this study)

For each factor, you will be asked to provide your perceptions on its relation to other factors, both in terms of polarity and strength.

Polarity indicates whether a factor has a direct or positive (+) influence or an inverse or negative (-) influence. Polarity is important for us to know as it can give insight into how the systems of interconnected factors might change over time.

A **positive (+) polarity** indicates that if a factor influencing (denoted with an arrow ) another factor INCREASES, the factor it is connected to will also INCREASE/IMPROVE.

A **negative (-) polarity** indicates that if a factor influencing (denoted with an arrow ) another factor INCREASES, the factor that it's connected to will DECREASE/DEGRADE.

**No Relationship** can be selected for pairs that have no clear causal relationship.

**Both increases and decreases (+/-)** can also be selected in instances where both positive (+) and negative (-) polarity are likely. For example, in certain situations poverty may lead to **or** deter migration.

Please note that the arrow ( ) indicates directionality where you will be asked how Factor A influences Factor B, NOT how Factor B influences Factor A.

Strength will be measured on a 5 point likert scale where:

**Very weak** indicates that the first factor only has *minimal influence* over the effected factor

**Weak** indicates that the first factor has *slight influence* over the effected factor

**Unclear** should be selected when there *is* a causal relationship, but you are unsure of its strength

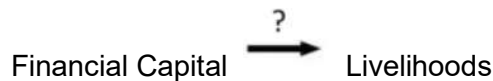

**Strong** indicates that the effected factor is *heavily influenced* by the first factor

**Very strong** indicates that the effected factor is *nearly entirely dependent* on the first factor

Strength will help us evaluate the importance of each factor in the system when creating our causal loop diagrams.

Each influencing factor should be considered as present in the system in order to evaluate its relationship to the effected factor.

**For example:**

This question should be read as, "If an individual or household has financial capital, it \_\_\_\_\_ their livelihood", where the blank can be filled in with "increases/improves" (direct relationship), "decreases/ degrades" (inverse relationship), "both increases and decreases", or no relationship.

You will not be able to return to this page but the definitions for each factor, as used in this study, as well as these notes can also be found in the '[Survey reference sheet](#)' pdf linked here as well as in your invitation email. Factor definitions will also appear if you hover over terms in the form.

If you have any questions as you are completing the survey, please feel free to reach out to Emily Nabong, [emily.nabong@sydney.edu.au](mailto:emily.nabong@sydney.edu.au), for clarification.

End of Block: Factor Definitions

Assuming conditions of **Q5/ChoiceGroup/SelectedChoices** are present in a community, please select the most appropriate choices for how **migration** interacts with the following factors.

A full list of factor definitions and question guidance can be found here: [Survey reference sheet](#). Definitions are also available if you hover over each factor in the sections below.

	Polarity: How does migration affect each factor?	How strong is this relationship?				
		Very Weak	Weak	Unclear	Strong	Very Strong
Migration $\xrightarrow{?}$ Social Services	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Political Stability	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Livelihoods	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Food Security	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Health	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Financial Capital	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Social Capital	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Physical Infrastructure	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Migration $\xrightarrow{?}$ Resource Security	<input type="text"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		Very Weak	Weak	Unclear	Strong	Very Strong

Start of Block: Feedback

Do you have any further comments on the study, factor definitions, or factor relationships?

---

---

---

---

---

---

Would you like to receive a summary of the findings of this study?

Yes, please send to the email contacted (1)

Yes, please send to alternative email (3)

---

No (2)

---

We are looking to include additional expertise in the field of climate migration. If you know of someone who may have valuable input, please share their contact details (e.g. email address) so they can be sent their own survey link.
