

Report VP Meetings, Policy Council Meeting Summer 2009
-- will be updated regularly --

2009 Albuquerque, NM

Thanks to Roberta, Len and Aldo and all other members of the organizing and the program committee for having prepared a wonderful conference.

2010 Seoul, Korea

After Roberta's visit in Korea this year (February 28 - March 6/7) a hotel as conference site has been chosen (Parktel Seoul). A program committee has been formed, including some Korean but also two international members. A Call-for-Papers has been published in System Dynamics Review. More information is available on the Executive Director's report.

2011 North-America

We have some interest from the Washington, DC area (main contact person: Imrana Umar). However, no final proposal has been submitted and no decision can be made right now. An alternative would be Boston as the default site. It is not sure whether the Seaport can be used again at conference hotel.

2012 Europe(?)

We have one strong proposal for hosting the conference 2012 in St. Gallen, Switzerland, supported by Markus Schwaninger and Stefan Grösser. Some other European and Non-European sites have indicated interest but no proposal has been submitted. Proposers from Australia and South Africa indicated that they would rather submit a proposal for 2014.

Conference location policy committee

A committee has been formed to analyse the possibility of defining a formal conference location policy.

Conference fee structure committee

A committee has been formed to update the conference fee structure. After some intentional delay, waiting for the new society fee structure to take effect, the committee can now start designing a proposal for a new conference fee structure (which could also mean leaving things as they are).

Andreas Größler, 07/07/2009
